MESSAGE

To see a Clean India has been my dream – to keep our streets and parks, our rivers and lakes, and our mountains and forests, clean, safe and beautiful. I laud the efforts of all who share this dream and work towards making this come true. I am delighted that Come Clean India Campaign has been working hard over the past year. I congratulate Imagindia and all the people from different walks of life who are part of this Campaign, and I hope it gathers momentum with more and more people joining in.

We must develop a sense of urgency and intolerance towards unclean environment on the part of all. We need to be responsible while generating waste, in recycling what is reusable and ensuring that the rest is disposed of in an environment-friendly manner. We must make our world cleaner and healthier for our children and generations to come, and they need to be taught how to keep it that way.

Let us all work together, rich and poor, young and old, and most importantly the civic authorities to start our journey towards building a Clean India. We have a long way to go, but we can get there with determination and will.

Gursharan Kaur
